Skills

Languages: SQL, Python (including, data analysis with pandas library), HTML, Ruby, Java
Familiar with Agile Scrum development process, use of Jira, comfortable with version control using Git.

Software Projects

| | |
|------------|---|
| Tweeter | Used Java and SQL to create our own version of Twitter. Created a working backend for the website with SQL and Cypher. This includes CRUD operations for the functioning of the website. |
| Comic Nook | Created a website where users review, discuss, and publish comic books. Created the backend using UML diagram and implemented them using models in the Ruby on Rails. Working to build the website also required heavy use of HTML. |
| Space Race | Created a game in collaboration with my Capstone team, with a VR and mobile version of a game that is accessible on Android and IOS devices. Created in collaboration with Advertising Department at University of Memphis to test the effectiveness of advertisements that are integrated into mobile and VR gameplay. |
